The DEAMON war is over - at 111-11-17 CONCORD had declared this war invalid as it breaches one or more articles in the Yulai Convention. After some weeks of agressings and fightings ongoing in the minmatar space silence came back to the trade routes as well as the hotspot Gulfondi. Some of the major fights where fought there. At the end of the war it becomed clear that Electus Matari is not an easy target to go for. Even if the propadanga of them stated that EM is only taking fights if they have a 1:3 advantage - survivors of several battles in Gulfondi wont agree to this picture.
Hard facts show a kill ratio of 2:1 for Electus Matari, as well as it was impossible for DEAMON to bring the science tower in Gulfondi into reinforce.

Additionally to the DEAMON war the war vs Privateers where going hot in the last week. With an overall kill ratio of 3:1 this war is even more worse for them as it was for DEAMON. Due to our operations the activities of them at the major trade hubs in minmatar space where interrupted hardly and on 111-11-19 Privateer Alliance just withdrew their side of the mutual war.
